6.2. Environmental Precautions

Local authorities should be advised if significant spillages cannot be contained.

6.3. Methods and materials for containment and cleaning up

Maintain good housekeeping practices to avoid accumulation of settled dust, especially on overhead surfaces. Cover powder spill with plastic sheet or tarp to minimize spreading and keep powder dry. Pick up and transfer to properly labeled containers. Take precautionary measures against static discharges. Do not dry sweep dust. Wet dust with water before sweeping or use a vacuum to collect dust. Keep in suitable and closed containers for disposal. The waste may be recovered and recycled.

6.4. Reference to other sections.

For personal protection see Section 8. See section 13 for disposal information.

8.2. Exposure Controls
Engineering measures

Provide appropriate exhaust ventilation at places where dust is formed.

Personal protective equipment

Respiratory Protection	If handling generates dust levels which causes irritation, or results in personal exposure exceeding the local occupational exposure standards (OES), then suitable approved dust respirator should be used. Personal exposure to dust should ideally be controlled to the lowest level possible below the OES.
Eye/Face Protection	Whenever airborne dust concentrations are high, appropriate protective eyewear, such as mono-goggles, should be worn to prevent eye contact.
Skin and Body Protection	Lightweight protective clothing.
Hand Protection	No special precautions required

Hygiene measures When using, do not eat, drink or smoke. Wear suitable gloves and eye/face protection. Wash hands before breaks and at the end of workday. Wash hands with water as a precaution. Regular cleaning of equipment, work area and clothing is recommended. Avoid breathing vapors, mist or gas.

Environmental exposure controls The product should not be allowed to enter drains, water courses or the soil.
